CARE AND MAINTENANCE

Regular maintenance is required to keep the Hexolite tabletop in good condition. For daily cleaning, it is recommended to use only hot water and a soft towel or sponge. Avoid household cleaning products that may use degreasers or abrasives. Some degreasers can attack the coating on the tabletop and cause damage.

Be sure the table is clean and completely dry before storage. Do not leave the table exposed to the weather for extended periods. Store out of direct sunlight, away from chemicals and moisture.

Aluminium Frame Care and Maintenance

Aluminium is designed to withstand various weather conditions and requires minimal upkeep. It is ideal for cleaning with a gentle mix of mild soap and water, a soft brush (such as nylon bristles or soft-textured natural brushes), or a clean, lint-free cloth.

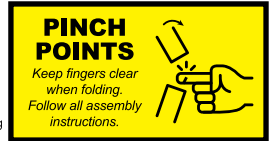

To maintain its pristine appearance, a wipe down with a microfiber cloth every 2-3 months should suffice to remove any slight dirt buildup or clouding. This routine is particularly crucial if you're near the beach to prevent unsightly salt accumulation on the frame.
